

MVEA Rate Increase

The Board of Directors of Mountain View Electric Association, Inc. has authorized the following changes in rates to become effective on bills calculated after July 1, 2011. As a member you can be assured that a rate adjustment is absolutely necessary to keep the cooperative financially stable and continue to provide safe, reliable electric power. The Grid Access is a monthly component of your bill used to cover a part of the fixed expenses incurred to provide access to the electric transmission grid to deliver energy to your home or business, regardless of how much electricity you use.

- **Residential Rate 16.01** - The monthly Grid Access component will be increased from \$13.95 to \$19.95 per month per meter, with no increase in the energy charge per kWh.
- **Residential Time-of-Day Rate 16.05** - The monthly Grid Access component will be increased from \$20.00 to \$26.00 per month per meter, with increases in the kWh energy component. Members on this rate will be contacted.
- **Irrigation Rates 17.30 and 17.31** - The monthly Horsepower component will be increased from \$2.65 to \$2.79 per horsepower per month; the minimum annual horsepower charge will be increased from \$159.00 to \$167.40 (5 horsepower); the energy charge per kWh will be increased from \$0.08722 to \$0.09193.
- **Wholesale Energy Primary Metering Rate 20.66** - The monthly Demand component will be increased from \$18.22 to \$21.50 per monthly kVA demand, with no increase in the energy charge per kWh.

I LIKE TO TAKE IT
EASY ON VACATION.
SO DOES MY
ENERGY BILL.

By adjusting my thermostat and turning off the water heater before I leave, I'm saving money even while I'm on vacation. What can you do? Find out how the little changes add up at TogetherWeSave.com.
